Read the following passage and mark the letter A, B, C or D to indicate the correct answer to each of the questions

.

Paul Bunyan is perhaps America's best-known folk hero. A fictional logger of incredible strength, he was most likely based on an actual nineteenth-century logger from the northern United States or Canada. As a folk hero, he struck a chord with Americans on some level, perhaps because he was incredibly strong but also because
Line he was hard-working and capable, ingenious in solving problems, and fun-loving.
(5) Though there is evidence that Paul Bunyan tales were part of oral tradition in the nineteen century, Paul Bunyan stories did not appear in written form until the early twentieth century. Journalist James McGillivray included descriptions of Bunyan in a series of essay entitled "The Round River Drive" which appeared in a number of Midwestern newspapers between 1906 and 1910. However, it was through an extensive advertising campaign that Paul Bunyan moved solidly into print.
(10) Recognizing the appeal of Paul Bunyan as a figure for his company's advertising, William Laughead, an advertising executive for the Red River Lumber Company, initiated a campaign that consisted of a series of publications featuring Paul Bunyan. For several decades, the company distributed these publications free of charge and made no attempt to obtain a copyright on **them**. In fact, the company vigorously encouraged other writers to make use of Paul Bunyan because it felt that the use of this character enhanced the name recognition of the Red
(15) River Lumber Company inasmuch as the name of the folk hero and the name of the company had become **interwoven**.

The Bunyan stories published by Red River and further circulated by others were tall tales of gigantic proportions. In these tales, Banyan is depicted as a man of superhuman proportions, who is strong, hard-working, entrepreneurial, and innovative. In one story, for example, Paul is credited with digging the Great Lakes in order to
(20) create a watering hole for his giant ox, Babe. In another of these tales, Paul caused an entire winter of blue snow to fall by swearing a blue streak after he injured himself by smashing his thumb with a large hammer. A third story in the series describes Paul's role in establishing the Mississippi River.

Fascination with Paul Bunyan has continued to grow, and today he is a standard of American folklores. The prevalence of Bunyan as a figure of folklore today is evidenced by references to him in **countless** stories,
(25) cartoons, poems, and songs as well as the numerous community festivals and logging competitions featuring Paul Bunyan that can be found throughout the sections of the country where logging has strong tradition.

Question 30. The purpose of this passage is to _____.
A. present the actual feats of a real-life logger **B.** provide an overview of American folktales
C. describe logging in North America **D.** discuss a "larger than life" folk hero
Question 31. It is **NOT** stated in the passage that Paul Bunyan is known for his _____.
A. unusual strength **B.** dedication to work
C. ingenuity in difficult situations **D.** serious nature
Question 32. The passage states that Paul Bunyan tales first appeared _____.
A. in oral stories **B.** in advertising **C.** in newspapers **D.** in a series of essays
Question 33. Which of the following **CANNOT** be inferred about the Red River Lumber Company's advertising campaign featuring Paul Bunyan?
A. It endured for quite a time.
B. The company did not protect its ownership of the stories.
C. The campaign did little to enhance the company's profitability.
D. The company wanted the name Paul Bunyan to be known as widely as possible.

WIND - The untamable weather machine

On 15 October 1987, the southern counties of Britain were struck by the strongest winds they had experienced in 200 years. Gusts of over 130 kilometers per hour slammed across the region and £1.5-billion-worth of damage was (**38**) _____ in just a few hours.

Extreme weather events like this are dramatic (**39**) _____ of the power of the wind. It's one part of the weather we generally don't give a second thought to in Britain but it plays a vital role in people's lives across the world. Without the formation and circulation of winds there would quite simply be no climate.

Some parts of the world seem to suffer more than others from the effects of 'ill winds', and links between particular winds and psychological problems date back centuries. The Föhn, the hot dry wind that slides off the slopes of the Alps, is capable of boosting temperatures quite suddenly by 10°C or more. It affects as many as one in three people in its (**40**) _____, making them feel anxious, irritable and generally ill. In California, many people dread the arrival of the Santa Ana, which rushes down from the high Mojave desert. Lyall Watson, in his book Heaven's Breath, claims that when the Santa Ana blows, murder rates soar.

The wind may get into the headlines when it comes in the form of tornadoes and hurricanes, but for the (**41**) _____ part it goes about its job of shifting huge masses of air around the planet. Plants take (**42**) _____ of this free ride to send their pollen grains far and wide. Trees rely on it to remove old leaves and make way for new growth. Spiders have been caught hitching a lift at altitudes of almost 4.5 kilometers.

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the questions.

In the United States in the early 1800's, individual state governments had more effect on the economy than did the federal government. States chartered manufacturing, banking, mining, and transportation firms and participated in the construction of various internal improvements such as canals, turnpikes, and railroads. The states encouraged internal improvements in two **distinct** ways; first, by actually establishing state companies to build such improvements; second, by providing part of the capital for mixed public-private companies setting out to make a profit.

In the early nineteenth century, state governments also engaged in a surprisingly large amount of direct regulatory activity, including extensive licensing and inspection programs. Licensing targets reflected both similarities and differences between the economy of the nineteenth century and that of today: in the nineteenth century, state regulation through licensing fell especially on peddlers, innkeepers, and retail merchants of various kinds. The perishable commodities of trade generally came understate inspection, and such important frontier staples as lumber and gunpowder were also subject to state control. Finally, state governments experimented with direct labor and business regulation designed to help the individual laborer or consumer, including setting maximum limits on hours of work and restrictions on price-fixing by businesses.

Although the states dominated economic activity during this period, the federal government was not inactive. Its goals were the facilitation of western settlement andthe development of native industries. Toward these **ends,** the federal government pursued several courses of action. It established a national bank to stabilize banking activities in the country and, in part, to provide a supply of relatively easy money to the frontier, where it was greatly needed for settlement. It permitted access to public western lands on increasingly easy terms, culminating in the Homestead Act of 1862, by which title to land could be claimed on the basis of residence alone. Finally, it set up a system of tariffs that was basically protectionist in effect, although maneuvering for position by various regional interests produced frequent changes in tariff rates throughout the nineteenth century.

Question 43. What does the passage mainly discuss?
A. States' rights versus federal rights.
B. The participation of state governments in railroad, canal, and turnpike construction.
C. The roles of state and federal governments in the economy of the nineteenthcentury.
D. Regulatory activity by state governments.
