TEST 04 *Full name:* .....

****

Mark the letter A, B, C, or D to indicate the correct arrangement of the sentence to make a meaningful paragraph/letter in each of the following questions.

Question 1.

a. Hence, community engagement in eco-friendly activities has surged, with a 40% increase in local participation.

b. Still, in spite of this momentum, the city continues to struggle with air quality issues, highlighting the need for ongoing improvements in urban planning.

c. The focus on sustainable practices has dramatically influenced urban life over the last decade.

d. This dedication to the environment has inspired numerous community initiatives, from tree planting events to educational workshops on sustainability.

e. Once overlooked, parks and natural habitats are now being restored and maintained, reflecting a commitment to preserving biodiversity.

A. c-d-a-e-b **B.** a-d-e-b-c **C.** c-e-b-d-a **D.** b-e-a-c-d

Question 2.

a. After about 90 minutes of cleaning, we gather with smiles, proud of our efforts, knowing that we've made a positive impact on the environment.

b. First, we split into smaller groups and collect trash around Notre-Dame Cathedral and 30-4 Park, ensuring that every corner is clean.

c. While working, we often talk, make friends, and practice Japanese together, which makes the experience more enjoyable and meaningful.

d. Every Sunday morning, I join around 40 Vietnamese and Japanese volunteers in front of the Saigon Central Post Office to clean nearby parks.

e. Finally, we sit down for coffee, share stories, and plan for the next weekend's cleanup, looking forward to continuing our work.

A. d-b-c-a-e **B.** d-b-a-e-c **C.** b-c-d-a-e **D.** b-a-c-d-e

Question 3. *Dear Mike,*

a. These activities not only make our school a better place but also help us become more responsible for protecting the environment.

b. Hope you're doing well! In your last letter, you asked me about what our school does to protect the environment.

c. We also encourage everyone to save energy by turning off lights and fans when they're not needed.

d. Besides, we often organize environmental campaigns where students make posters and give presentations about eco-friendly habits.

e. Well, we have a lot of activities to keep our school green and clean. For example, we plant trees and have a composting system to reduce waste.

Best,

Phillips

A. c-a-d-b-e **B.** b-e-c-d-a **C.** d-b-a-c-e **D.** a-d-b-c-e

Read the following passage and mark the letter A, B, C or D to indicate the option that best fits each of the numbered blanks.

New research supports the idea that lack of protein leads to overeating. Researchers from the University of Sydney followed the dietary habits of almost 10,000 Australians for one year, (**4**) _____. They found that people eat to get enough protein, so when their food is low in protein, they must eat more. This is sometimes called "protein hunger."

Other participants in the study (**5**) _____ in order to compensate for insufficient protein intake, often without realizing it. Eating more of the food that is prevalent in modern supermarkets, i.e. processed food, also means eating more calorie-dense types of food.

Many people who consumed less protein at breakfast tended to snack more and eat fewer healthy foods. (**6**) _____. In contrast, those who consumed sufficient protein in the morning generally reported reduced hunger later in the day. (**7**) _____. Protein performs many essential biological functions. It is vital for building muscle and repairing tissue damage, and it also contributes to hormone regulation and immune function.

Finally, increasing protein intake can improve dietary balance and reduce overeating tendencies, (**8**) _____, particularly when individuals rely heavily on processed foods that are high in fat and sugar.

Question 4.

A. which provided them with detailed data on eating patterns

B. result in the collection of detailed data on eating patterns

C. they provided them with detailed data on eating habits

D. a process that it provided with detailed information about their diets

Question 5.
A. tend to consume more calories
B. showing a tendency to increase calorie intake
C. are associated with higher calorie consumption
D. likely to consume additional calories

Question 6.
A. This pattern suggests inadequate protein raises calorie intake.
B. Such dietary behaviour causing to excessive calorie use.
C. Suggesting inadequate protein raises calorie consumption.
D. That insufficient protein intake lead to overeating.

Question 7.
A. Our bodies need protein, it supports many vital processes.
B. While protein performs many essential biological functions, it is often underconsumed.
C. It makes sense that our bodies want protein because it does many things for us.
D. This biological role contributes to hormone regulation explains the importance of protein.

Question 8.
A. with differences observed across people
B. since individual responses are not identical
C. because reactions differ from person to person
D. although this effect may vary among individuals

Read the following leaflet and mark the letter A, B, C or D to indicate the correct option that best fits each of the numbered blanks.

Conserving Our Planet: An Urgent Call

The Growing Threat
Every day, we hear about the decline of wildlife. Habitat loss and deforestation caused by forest clearance are pushing many species to the (**9**) _____ of extinction. Primate species like the gibbon or marine life on coral reefs are all under severe pressure. We cannot (**10**) _____ from taking action.

Immediate Action
We need to take effective measures to protect the geographic range of animals. Poaching and illegal hunting mean that poachers must be strictly punished. Some countries are introducing stricter laws to address this issue. Several veterinarians and wildlife rescuers work hard (**11**) _____ release rehabilitated animals back into the wild.

Global Scope
The natural world is home to a great deal of life. Many species, such as the sturgeon or the banana frog, are now listed as critically endangered. Even a small (**12**) _____ of marine debris can cause severe harm. Efforts to rescue injured creatures are vital, but (**13**) _____ major problem is preventing extinction.

Conservation Partnership
The (**14**) _____ of biodiversity is a collective responsibility. We must raise funds for ecosystem restoration projects in areas that have been degraded. Successful conservation campaigns happen when many people participate. By contributing to these efforts, we ensure the survival of future generations.

Question 9. A. brink	**B.** edge	**C.** foot	**D.** range
Question 10. A. hold up	**B.** hold back	**C.** hold out	**D.** hold on
Question 11. A. consequent to	**B.** in order to	**C.** because of	**D.** on account of
Question 12. A. volume	**B.** load	**C.** number	**D.** amount
Question 13. A. another	**B.** the other	**C.** other	**D.** others
Question 14. A. preservation	**B.** exploitation	**C.** maintenance	**D.** recovery

Choose the best option A, B, C or D to complete the following sentences.

Question 15: Hyperinflation is not a rare event. Since Weimar Germany, there have been 29 additional hyperinflations around the world, including those in Austria, Argentina, Greece and Brazil, to name but _____.
A. too much **B.** a little **C.** too many **D.** a few

Question 16: After a month of apprenticeship, I hope to _____ the ropes and won't keep bothering you for help.
A. study **B.** learn **C.** grasp **D.** hold

Question 17: In some movies, a stepmother is often described as a completely hard and selfish person, not having the _____ of human kindness.
A. tear **B.** flesh **C.** milk **D.** blood

Question 18: _____ kept beeping the car horn loudly and the other drivers got annoyed.
A. It is him that **B.** He was the one **C.** It was he who **D.** The one who

Question 19: The film, which was made_____, surprised everyone by winning three Oscars, including the one for Best Picture.
A. up to speed **B.** all in good time **C.** under the counter **D.** on a shoestring

Question 20: He apologized for having accidentally hurt me, saying that it just _____ like that.
A. came out **B.** went out **C.** broke out **D.** missed out

Question 21: When wood, natural gas, oil, or any other fuel burns, _____ with oxygen in the air to produce heat.
A. a combination of substances in the fuel
B. combining substances in the fuel
C. substances in the fuel that combine
D. substances in the fuel combine

Question 22: The first village _____ was not far from my city.
A. where I visited **B.** that I visited to **C.** to which I visited **D.** I visited
Question 23: Buying a first home is still a milestone for many young couples, _____ earlier generations.
A. as it was for **B.** like that of **C.** so have **D.** as did
Question 24: When we got to the island, we realized that the water was not safe to drink and that we_____ have brought water purification tablets.
A. would **B.** must **C.** could **D.** should

Read the following leaflet and announcement and choose the option A, B, C or D to fill in the following blanks.

Discover the Timeless Beauty of Southern Spain!

- **Cultural Journey**: Explore sunlit landscapes where **(25)** _____ whitewashed villages blend harmoniously with endless olive groves.
- **Authentic Encounters**: Experience Andalusia's essence through captivating flamenco, delicious local cuisine, and traditional markets **(26)** _____ with history.
- **Expert-Led Discoveries**: Unravel the rich Moorish heritage, guided by local experts, as you explore ancient palaces and historic landmarks.
- **Natural Wonders**: **(27)** _____ the region's breathtaking diversity, from sparkling coastlines to the Sierra Nevada mountains.

To secure your place on this unforgettable adventure, contact us at:

- Email: info@spaintours.com
- Phone: +34 987 654 321

Your unforgettable journey awaits!

Question 25: **A.** rewinding **B.** towering **C.** soaring **D.** ascending
Question 26: **A.** alive **B.** cool **C.** deep **D.** acute
Question 27: **A.** Notice **B.** Detect **C.** Explore **D.** Investigate

Embark on the Future: Viettel 5G Launch Day!

Join us on October 15th for the momentous unveiling of 5G technology - set to revolutionize connectivity!

Key Features of 5G:

- **Lightning-Fast Speeds**: Experience download speeds up to 100 times **(28)** _____ 4G, transforming how you access content.
- **Remarkably Low Latency**: Enjoy instantaneous responsiveness, facilitating innovations in remote surgery and autonomous vehicles.
- **Extensive Connectivity**: Seamlessly connect a multitude of devices, **(29)** _____ the era of smart cities and the Internet of Things.

Seize the opportunity to witness how 5G will **(30)** _____ our digital landscape!
Location: Viettel Office, Hanoi
Time: October 15th
RSVP: @Viettel.org.vn
Step into a new era with 5G!

Question 28: **A.** faster than **B.** faster and faster **C.** the fastest **D.** so fast as
Question 29: **A.** catching up **B.** clinging on **C.** stemming from **D.** ushering in
Question 30: **A.** retrieve **B.** reproduce **C.** redefine **D.** refrain

Read the following passage and mark the letter A, B, C or D to indicate the best answer to each of the following questions.

Limestone Caves

Caves are underground chambers formed in three main ways: by ocean waves eroding shorelines to create sea caves, by cooling lava that forms lava tube caves, and most commonly by the dissolution of limestone rock by rainwater and melting snow. Limestone caves occur worldwide and include some of the largest and deepest cave systems on Earth, such as the Mammoth–Flint Ridge system in Kentucky, which stretches more than 306 kilometers. The formation of these caves takes millions of years.

Limestone originates in shallow seas from the **accumulation** of shells and skeletons of marine organisms such as coral. Over long periods, these deposits harden into solid rock and may eventually rise above sea level due to geological processes. Rainwater absorbs carbon dioxide from the soil, forming a weak carbonic acid solution. This slightly acidic water seeps into cracks and weaknesses in the limestone, gradually dissolving the rock into calcium carbonate in solution. As the acidic water continues to flow downward toward the water table, **it** enlarges underground channels over thousands of years, producing distinctive landscapes known as karst. Openings to the surface may form when rock collapses into sinkholes or when streams cut horizontal entrances into cave walls.

As these channels widen, they hold more water and dissolve more rock, eventually developing into large cave systems. **[I]** **However, some caves may dry out when the water table drops or when tectonic movements lift them above the groundwater level, allowing air to enter**. **[II]** Flowing water may continue shaping the caves, while dripping mineral-rich water forms deposits known as speleothems. **[III]** The most familiar formations are stalactites, which hang from ceilings, and stalagmites, which rise from floors. Other formations include drapery, flowstone, gypsum flowers, and helictites. **[IV]** Famous examples of limestone caves include Carlsbad Caverns in New Mexico and Luray Caverns in Virginia.

Caves have long provided shelter for both humans and animals. Prehistoric people once lived in caves, and early artworks have been discovered on their walls. Today, many species—including bats, birds, insects, and bears—depend on cave environments for survival. In particular, bat droppings (guano) support entire underground ecosystems by providing essential nutrients for other organisms.

(Adapted from *How to Master Skills for the TOEFL iBT – Reading – Advanced*)

Question 31. According to the passage, which of the following is the most common way caves are formed?
A. By the dissolution of limestone rock **B.** By ocean waves eroding shorelines
C. By cooling lava forming tubes **D.** By tectonic movements underground

Question 32. The word **accumulation** in paragraph 2 is closest in meaning to
A. collection **B.** destruction **C.** separation **D.** exposure

Question 33. Which sentence best summarizes paragraph 1?
A. Limestone caves are famous for their impressive mineral formations and underground beauty.
B. Caves form in different ways and limestone caves are the most common and extensive.
C. Caves were once used by prehistoric humans as underground chambers to store their food.
D. Many endangered animals depend on some of the largest and deepest cave systems for survival.

Question 34. According to the passage, which substance in rainwater helps dissolve limestone?
A. oxygen **B.** carbon dioxide **C.** sulfur **D.** nitrogen

Question 35. Which of the following is **NOT** mentioned as a type of speleothem?
A. coral **B.** drapery **C.** helictites **D.** flowstone

Question 36. The word **it** in paragraph 2 refers to
A. acidic water **B.** underground channel **C.** water table **D.** calcium carbonate

Question 37. Which of the following best paraphrases the underlined sentence in paragraph 3?
A. Caves may become wetter when groundwater rises and air is prevented from entering.
B. Powerful earthquakes may flood caves permanently and block outside air from entering.
C. Caves may dry out if groundwater falls or land rises, allowing air to enter.
D. Flowing streams may create caves underground while preventing outside air from entering.

Question 38. What can be inferred about karst landscapes?
A. They are formed suddenly as a result of earthquakes.
B. They develop gradually through long-term limestone dissolution.
C. They are created entirely from hardened volcanic lava.
D. They are found only in extremely dry desert regions.

Question 39. Where in the passage does the following sentence best fit in Paragraph 3?
"These changes can significantly alter the internal structure of the cave over time."
A. [**I**] **B.** [**IV**] **C.** [**II**] **D.** [**III**]

Question 40. Which option best summarizes the entire passage?
A. Modern animals benefit from caves, but humans rarely depend on them today.
B. Lava caves are more widespread worldwide and more significant than limestone caves.
C. Limestone caves form gradually through geological processes and provide habitats for humans and wildlife.
D. Caves are primarily tourist attractions admired for their impressive mineral formations.

Read the following passage and mark the letter A, B, C, or D to indicate the correct answer to each of the following questions.

CAREER CHOICES

In the past, the path from high school to a career was often linear and predictable. A student would graduate, perhaps attend university, join a company, and steadily climb the corporate ladder until retirement. However, for today's high school students, the landscape of work is shifting beneath their feet. The "job for life" concept is rapidly becoming a relic of the past, replaced by the "gig economy," remote work, and a dynamic market where adaptability is the new currency.

One of the most significant sources of anxiety for teenagers is the pressure to choose a "perfect" career at the age of 18. This anxiety is fueled by the misconception that a choice made now is irreversible. Career counselors today emphasize that students should not focus solely on job titles, which may become **obsolete** in a decade due to automation. Instead, the focus should shift toward acquiring transferable skills—such as critical thinking, digital literacy, and emotional intelligence. These are the tools that will allow young people to pivot across different industries as the market evolves.

Furthermore, the debate between following one's passion and seeking financial stability remains **contentious**. While the adage "do what you love, and you'll never work a day in your life" sounds appealing, it can be misleading. Not every hobby translates into a viable career. Experts suggest a "career prototype" approach: trying out small versions of a job through

internships, volunteering, or shadowing professionals. **This** allows students to test their assumptions about a career before committing years of education to it.

Another crucial factor is the rise of interdisciplinary fields. The most exciting opportunities often lie at the intersection of different domains, such as bioinformatics (biology and computer science) or green architecture (environmental science and design). Students are encouraged to maintain a broad curiosity rather than narrowing their focus too early.

Ultimately, the most successful individuals in the future will be "lifelong learners." The diploma received at university graduation is no longer the finish line but merely a checkpoint. **The willingness to unlearn old habits and relearn new technologies will be the defining characteristic of the modern workforce.**

Question 41. The word "**This**" in paragraph 3 refers to _____.
A. The misleading adage about doing what you love. **B.** The debate between passion and stability.
C. The approach of trying out small versions of a job. **D.** The commitment to years of education.
Question 42. In which paragraph does the author discuss the importance of skills that can be used in various industries?
A. Paragraph 5 **B.** Paragraph 3 **C.** Paragraph 2 **D.** Paragraph 1
Question 43. According to the passage, why do many teenagers feel anxious about choosing a career?
A. They are forced to choose careers that their parents prefer.
B. They believe that their current choice cannot be changed later.
C. They are afraid of the "gig economy" and remote work.
D. They lack the necessary digital literacy skills for modern jobs.
Question 44. The word "**contentious**" in paragraph 3 is **CLOSEST** in meaning to _____.
A. insignificant **B.** universal **C.** controversial **D.** agreeable
Question 45. Which paragraph mentions the strategy of testing a job before fully committing to it?
A. Paragraph 4 **B.** Paragraph 1 **C.** Paragraph 3 **D.** Paragraph 2
Question 46. The word "**obsolete**" in paragraph 2 is **OPPOSITE** in meaning to _____.
A. expensive **B.** outdated **C.** useless **D.** modern
Question 47. Which of the following is **NOT** true according to the passage?
A. The concept of staying in one job for a lifetime is becoming outdated.
B. Career counselors advise students to focus primarily on specific job titles.
C. Interdisciplinary fields combine knowledge from different domains.
D. A university diploma is considered just a checkpoint in a lifelong learning journey.
Question 48. Which of the following best paraphrases the underlined sentence in the last paragraph?
A. Modern workers are defined by their ability to refuse old habits and reject new technologies.
B. To succeed in the modern workforce, one must be ready to discard outdated practices and acquire new technical skills.
C. Workers today are willing to learn new technologies only if they can keep their old habits.
D. The defining characteristic of the workforce is the stability of old habits combined with new technologies.

Choose the relevant reply to each of the situations below.

Question 49: *Rosie:* ……. *Jolie:* Once beaten twice shy.
A. How terrible is the test score!
B. She was defeated again.
C. Has the cat got your tongue?
D. She is still all on her own.

Question 50: *Harry:* You look so tired! *Tina:* …….
A. Never mind! All work and no play makes Jack a dull boy.
B. There's no way for me to miss that deadline.
C. I've been snowed under with work this week.
D. We haven't got any hope in hell of meeting such a tight deadline.

------ THE END -------
