TEST 05 ***Full name:*** .....

*****

CIRCLE the words/phrases that best complete the sentences.

Question 1. When autumn leaves fall to the ground, they slowly _____ and enrich the soil with vital nutrients.
A. integrate **B.** delegate **C.** decompose **D.** alleviate

Question 2. Let's _____ the situation before we make a final decision.
A. catch up with **B.** brush up on **C.** take stock of **D.** make up for

Question 3. The claim that eating red and processed meat increases the risk of heart attack _____ our eyebrows.
A. should be raising **B.** have raised **C.** will be raised **D.** has been raising

Question 4. The doctor recommended that Neil should take Echinacea, a plant that is used as a medicine, to keep colds at ____.
A. bay **B.** channel **C.** lake **D.** river

Question 5. The survey indicates that Coronavirus may _____ the end of foreign travel for a while.
A. flee **B.** hit **C.** spell **D.** strike

Question 6. Seo-yeon's 40th birthday party was very _____: just a few friends at a local pub.
A. lowland **B.** lowlight **C.** low-flying **D.** low-key

Question 7. After the earthquake, the entrance hall was turned into a _____ Casualty Ward.
A. mainstay **B.** makeshift **C.** piecework **D.** wayside

Question 8. It was a _____in the guts when the students' exams were cancelled at the last minute.
A. fake story **B.** real kick **C.** free spirit **D.** red alert

Question 9. By eating organic, you can enjoy delicious food and _____ to a healthier planet, so let's encourage your family and friends to try organic food too!
A. achieve **B.** object **C.** contribute **D.** treat

Question 10. The company plans to go _____ by installing solar panels and using recyclable packaging.
A. white **B.** green **C.** pink **D.** dark

Read the passage then CIRCLE the correct answers to the questions.

METEORITE IMPACT AND DINOSAUR EXTINCTION

There is increasing evidence that the impacts of meteorites have had important effects on Earth, particularly in the field of biological evolution. Such impacts continue to pose a natural hazard to life on Earth. Twice in the twentieth century, large meteorite objects are known to have collided with Earth.

If an impact is large enough, it can disturb the environment of the entire Earth and cause an ecological catastrophe. The best-documented such impact took place 65 million years ago at the end of the Cretaceous period of geological history. This break in Earth's history is marked by a mass extinction, when as many as half the species on the planet became extinct. While there are a dozen or more mass extinctions in the geological record, the Cretaceous mass extinction has always intrigued paleontologists because it marks the end of the age of the dinosaurs. For tens of millions of years, those great creatures had flourished. Then, suddenly, they disappeared.

The body that impacted Earth at the end of the Cretaceous period was a meteorite with a mass of more than a trillion tons and a diameter of at least 10 kilometers. Scientists first identified this impact in 1980 from the worldwide layer of sediment deposited from the dust cloud that enveloped the planet after the impact. This sediment layer is enriched in the rare metal iridium and other elements that are relatively abundant in a meteorite but very rare in the crust of Earth. Even diluted by the terrestrial material excavated from the crater, this component of meteorites is easily identified. By 1990 geologists had located the impact site itself in the Yucatán region of Mexico. The crater, now deeply buried in sediment, was originally about 200 kilometers in diameter.

This impact released an enormous amount of energy, **excavating** a crater about twice as large as the lunar crater Tycho. The explosion lifted about 100 trillion tons of dust into the atmosphere, as can be determined by measuring the thickness of the sediment layer formed when this dust settled to the surface. Such a quantity of material would have blocked the sunlight completely from reaching the surface, plunging Earth into a period of cold and darkness that lasted at least several months. The explosion is also calculated to have produced vast quantities of nitric acid and melted rock that sprayed out over much of Earth, starting widespread fires that must have **consumed** most terrestrial forests and grassland. Presumably, those environmental disasters could have been responsible for the mass extinction, including the death of the dinosaurs.

Several other mass extinctions in the geological record have been **tentatively identified** with large impacts, but none is so dramatic as the Cretaceous event. But even without such specific documentation, it is clear that impacts of this size do occur and that their results can be catastrophic. What is a catastrophe for one group of living things, however, may create opportunities for another group. Following each mass extinction, there is a sudden evolutionary burst as new species develop to fill the ecological niches opened by the event.

Impacts by meteorites represent one mechanism that could cause global catastrophes and seriously influence the evolution of life all over the planet. According to some estimates, the majority of all extinctions of species may be due to such impacts. Such a perspective fundamentally changes our view of biological evolution. The standard criterion for the survival of a species is its success in competing with other species and adapting to slowly changing environments. Yet an equally important criterion is the ability of a species to survive random global ecological catastrophes due to impacts.

Earth is a target in a cosmic shooting gallery, subject to random violent events that were unsuspected a few decades ago. In 1991 the United States Congress asked NASA to investigate the hazard posed today by large impacts on Earth. The group

conducting the study concluded from a detailed analysis that impacts from meteorites can indeed be hazardous. Although there is always some risk that a large impact could occur, careful study shows that this risk is quite small.

(*Toefl Practice test 1, Volume 1*)

Question 11. In paragraph 2, why does the author include the information that dinosaurs had flourished for tens of millions of years and then suddenly disappeared?

A. To explain why as many as half of the species on Earth at the time are believed to have become extinct at the end of the Cretaceous

B. To explain why paleontologists have always been intrigued by the mass extinction at the end of the Cretaceous

C. To provide evidence that an impact can be large enough to disturb the environment of the entire planet and cause an ecological disaster

D. To support the claim that the mass extinction at the end of the Cretaceous is the best-documented of the dozen or so mass extinctions in the geological record

Question 12. Which of the following can be inferred from paragraph 3 about the location of the meteorite impact in Mexico?

A. Geologists knew that there had been an impact before they knew where it had occurred.

B. It was a well-known fact that the impact had occurred in the Yucatán region.

C. The location of the impact site in Mexico was kept secret by geologists from 1980 to 1990.

D. The Yucatán region was chosen by geologists as the most probable impact site because of its climate.

Question 13. According to paragraph 3, how did scientists determine that a large meteorite had impacted Earth?

A. They discovered a large crater in the Yucatán region of Mexico.

B. They found a unique layer of sediment worldwide.

C. They located a meteorite with a mass of over a trillion tons.

D. They were alerted by archaeologists who had been excavating in the Yucatán region.

Question 14. The word "**excavating**" in paragraph 4 is closest in meaning to _____.

A. covering up **B.** destroying **C.** digging out **D.** extending

Question 15. The word "**consumed**" in paragraph 4 is closest in meaning to _____.

A. changed **B.** covered **C.** destroyed **D.** exposed

Question 16. According to paragraph 4, all of the following statements are true of the impact at the end of the Cretaceous period EXCEPT:

A. A large amount of dust blocked sunlight from Earth. **B.** Earth became cold and dark for several months.

C. Large quantities of nitric acid were produced. **D.** New elements were formed in Earth's crust.

Question 17. The phrase "**tentatively identified**" in paragraph 5 is closest in meaning to _____.

A. easily identified **B.** identified after careful study

C. identified without certainty **D.** occasionally identified

Question 18. According to the passage, who conducted investigations about the current dangers posed by large meteorite impacts on Earth?

A. Geologists **B.** NASA **C.** Paleontologists **D.** The United States Congress

Mark the letter A, B, C, or D to indicate the correct arrangement of the sentence to make a meaningful paragraph/letter/ conversation in each of the following questions.

Question 19.

a. *Linh:* That's right. They organize courses to help teachers improve their teaching skills and use digital technology in classrooms.

b. *Linh:* Exactly! Plus, they offer training on life – saving skills for both teachers and students, and help children and households who are in need.

c. *Minh:* They also create more opportunities for children in remote areas by giving them books and school materials so they can have access to learning.

d. *Linh:* Have you heard about Save the Children? It's an international NGO that helps improve children's lives around the world.

e. *Minh:* Yes, I know! They started their work in Vietnam in 1990 and provide practical support in areas like education and training.

A. d – c – a – e – b **B.** b – e – a – c – d **C.** b – c – a – e – d **D.** d – e – a – c – b

Question 20.

Dear Alex,

a. This integration of technology seems to be transforming traditional teaching methods and enhancing educational outcomes.

b. I recently came across an article discussing the increasing use of artificial intelligence in classrooms, which I found quite fascinating.

c. I hope you're doing well and had a chance to relax over the weekend.

d. I'd love to hear your thoughts on this development and how you think it might impact our education system.

e. The piece highlighted how AI tools are now assisting teachers by grading assignments and providing personalized learning experiences for students.

Best regards,

Taylor

A. c – b – e – a – d **B.** c – d – e – a –b **C.** a – e – b – c – d **D.** a – b – e – c – d

Question 21.

a. This wave of immigration not only puts pressure on urban services but also raises concerns about the long-term sustainability of cities.

b. One major reason for immigration to big cities is the limited access to health services in remote areas, which drives people to move in search of better healthcare and living standards.

c. For example, many rural residents migrate to urban areas because local hospitals often lack trained medical professionals and proper equipment, as seen with hospitals like Bach Mai and K Hospital, which struggle to meet the demands of patients from small provinces.

d. As a result, the chances of securing a position have decreased significantly, from 33% to as low as 7%.

e. In addition to healthcare, another factor is the search for better job opportunities; with more people moving to the cities, competition for jobs has become fierce.

A. b-d-c-e-a **B.** b-c-e-d-a **C.** e-c-b-d-a **D.** b-e-c-d-a

Question 22.

a. For teachers, technology offers tools to design more flexible lessons, track progress efficiently, and provide timely feedback that supports individual growth.

b. At the same time, meaningful learning still depends on how these tools are used, as passive consumption can limit critical thinking and deep understanding.

c. Technology plays an increasingly central role in education by expanding access to information and learning opportunities beyond the traditional classroom.

d. When integrated thoughtfully, technology enhances education not by replacing teachers, but by strengthening the connection between instruction, practice, and real-world application.

e. Digital platforms allow students to learn at their own pace, revisit complex ideas, and engage with content through interactive formats that suit different learning styles.

A. c – d – b – a – e **B.** e – b – d – a – c **C.** e – a – c – d – b **D.** c – e – a – b – d

Read the following passage and mark the letter A, B, C, or D to indicate the correct option that best fits each of the numbered blanks.

Studying abroad can be an enriching experience, but it also involves a number of uncertainties that prospective students must carefully consider. These may include concerns about academic standards, cultural differences, financial pressures, or (**23**) _____. Before making a final decision, students often weigh the likelihood of such challenges occurring, assess whether they can be managed effectively, and consider the long-term impact they may have on their personal and professional development.

For some individuals, uncertainty is part of the appeal, as it encourages independence and personal growth, (**34**) _____. Others, however, prefer stability and predictability, and therefore seek to minimize uncertainty as much as possible. Naturally, the perceived seriousness of potential difficulties plays a crucial role in this process. (**25**) _____. As a result, more cautious students tend to favour institutions with established reputations, well-defined support systems, and clearly structured programmes, as these features help reduce uncertainty and perceived risk.

(**26**) _____. Research suggests that many students still hesitate to rely solely on online platforms when selecting overseas universities. This hesitation can be explained partly by the absence of direct interaction with experienced advisors and partly by (**27**) _____.

(Adapted from Higher Education and Global Mobility)

Question 23.

A. the education system is directly experienced upon arrival
B. to directly experience the education system after arrival
C. lacking direct experience of the education system until arrival
D. having experienced the education system directly

Question 24.

A. although it does not necessarily deter them from pursuing such opportunities
B. if independence is prevented by uncertainty
C. because it creates barriers that cannot be overcome
D. so uncertainty itself always discourages international study

Question 25.

A. All potential difficulties are generally considered manageable
B. Challenges perceived as severe are more likely to discourage risk-taking
C. Students tend to underestimate the impact of potential difficulties
D. Serious challenges are often viewed as opportunities for personal development

Question 26.

A. The methods students use to gather information are also influenced by risk perception
B. Information is gathered by students through methods that are risky
C. Students gather information after risks and methods are chosen carefully
D. Risky methods are chosen when students gather information

Question 27.

A. reliable and objective information is doubted by online platforms
B. objectivity is ensured through online information reliability
C. doubts regarding the reliability and objectivity of online information
D. the online information is reliable despite doubts about objectivity

Read the following advertisement and mark the letter A, B, C or D to indicate the correct option that best fits each of the numbered blanks.

PROTECT OUR PLANET'S WILD HEART

On World Wildlife Day, we pause to celebrate the stunning variety of life (**28**) _____ our planet unique and vibrant. From the smallest insects to the largest whales, every single species plays a crucial role in the health and function of our shared global ecosystems.

Sadly, this (**29**)_____ beauty is under severe threat. Habitat loss, climate change, and illegal trade continue to push countless animals and plants closer to the brink of extinction every single day.

We cannot afford to lose these magnificent creatures. (**30**) _____ wildlife is not just about saving endangered species; it's fundamentally about protecting the (**31**) _____ that provides humanity with clean air, fresh water, and vital food security. Every one of us has the power to make a significant difference.

If we act together today to support sustainable initiatives and stricter protection laws, we can truly reverse these dangerous trends and ensure a brighter future (**32**) _____ global biodiversity. Donate to a trusted conservation organization, volunteer your time, or simply commit (**33**) _____ your carbon footprint.

Let's stand up for nature. Our future depends on it.

Question 28. **A.** to make **B.** making **C.** maked **D.** that make
Question 29. **A.** incredibly **B.** incredibility **C.** incredibleness **D.** incredible
Question 30. **A.** Remaining **B.** Reserving **C.** Maintaining **D.** Preserving
Question 31. **A.** ecological balance delicate **B.** delicate ecological balance
C. ecological delicate balance **D.** balance ecological delicate
Question 32. **A.** with **B.** for **C.** along **D.** under
Question 33. **A.** to reduce **B.** reduce **C.** to reducing **D.** reducing

Mark the letter A, B, C or D to indicate the correct answer to each of the following questions.

Question 34. She explained the directions very quickly, _____ made the children confused.
A. who **B.** when **C.** that **D.** which
Question 35. Can you please _____ the containers before putting them in the bin?
A. throw away **B.** save up **C.** break down **D.** rinse out
Question 36. The local farmers are encouraged to use _____ to provide nutrients for their crops.
A. landfill **B.** garbage **C.** leftover **D.** compost
Question 37. Using reusable shopping bags is one of the simplest eco-friendly _____ you can adopt.
A. habits **B.** cultures **C.** customs **D.** rituals
Question 38. I get angry and frustrated with Hannah's temper, but I'm a great believer in expressing my feelings to _____ before we went any further.
A. clear the air **B.** ring a bell **C.** bite the dust **D**. strike a note
Question 39. I could not _____ the lecture at all. It was too difficult for me.
A. hold on **B.** make off **C.** get along **D.** take in
Question 40. By installing solar panels, we can _____ our goal of reducing our carbon footprint.
A. accomplish **B.** succeed **C.** conduct **D.** satisfy

Read the following passage and mark the letter A, B, C, or D to indicate the correct answer to each of the following questions.

AI IN LANGUAGE LEARNING

The integration of Artificial Intelligence (AI) into language learning has revolutionized the way individuals acquire new tongues, moving the process from dusty textbooks to dynamic, interactive screens. **[I]** No longer confined to the rigid schedules of traditional classrooms, learners now have access to personalized tutors in their pockets, available twenty-four seven. **[II]** This transformation arises from advances in Natural Language Processing (NLP) and machine learning, which analyze large datasets and adapt lessons to each learner's progress. **[III]** However, as with any disruptive technology, the ubiquity of AI in education brings both transformative benefits and significant challenges that merit close scrutiny. **[IV]**

One of the most touted advantages of AI is its ability to provide instant, non-judgmental feedback. In a traditional setting, a student might hesitate to speak for fear of making mistakes in front of peers. AI-powered apps, conversely, offer a safe space where learners can practice pronunciation and grammar repeatedly without embarrassment. Furthermore, these systems employ adaptive learning techniques; if a user struggles with the subjunctive mood in Spanish, the program notices and adds more exercises on that topic later. This level of personalization could not be achieved in a classroom with thirty students before.

Even so, people worry about losing the "human element" in language learning. Language is more than rules; it carries culture, emotion, and nuance. Too much dependence on AI could lead to shallow fluency: knowing the rules but not being able to use language well in real life.

Moreover, the role of the teacher is being **reconfigured** rather than replaced. The fear that AI will make educators obsolete is largely unfounded. Instead, the teacher's role is shifting from a deliverer of knowledge to a facilitator and mentor. **Teachers can leverage AI tools to handle repetitive tasks like grading and vocabulary drilling, freeing up valuable class time for complex interactive activities, debates, and cultural immersion that machines cannot replicate.**

Data privacy is another important issue. These apps collect lots of data to improve their programs. **This** raises questions about how this data is stored, who owns it, and whether it could be sold in ways that harm privacy.

In conclusion, while AI serves as a powerful **supplementary** tool that makes language learning more accessible and efficient, it should not replace human interaction. The future of learning will likely mix technology with human guidance. Machines handle the mechanics, while people help with connection and culture.

Question 41. Which of the following best serves as the title for the passage?

A. The End of Traditional Language Classrooms. **B.** How AI Algorithms Work in Education.

C. Why Human Teachers are Better than Machines. **D.** AI in Language Learning: A Double-Edged Sword.

Question 42. Which of the following best summarizes the reading passage?

A. AI has transformed language learning by providing 24/7 personalized, data-driven tutoring, and raises little concerns about human connection.

B. AI focuses solely on grammar and ignores cultural context but it is likely to replace teachers in language learning.

C. AI makes language learning more personalized and accessible, but human guidance remains essential for culture, nuance, and privacy.

D. AI's only benefit is faster feedback, with no significant drawbacks or considerations for culture and privacy.

Question 43. According to paragraph 2, why is AI considered a "safe space" for learners?

A. It connects them with other learners who are at the same level.

B. It protects their personal data securely.

C. It prevents them from making any grammatical errors.

D. It allows them to practice without fear of judgment from others.

Question 44. Which of the following is TRUE according to the passage?

A. AI tools can help save time for teachers by handling repetitive tasks.

B. The author believes AI will eventually replace human interaction entirely.

C. Teachers should stop teaching grammar and focus only on culture.

D. AI is currently capable of perfectly understanding sarcasm and cultural nuance.

Question 45. The word " **supplementary** " in the last paragraph is **OPPOSITE** in meaning to _____.

A. auxiliary **B.** supporting

C. main **D.** unnecessary

Question 46. The word "**This**" in paragraph 5 refers to _____.

A. The ethical privacy of AI. **B.** The compromise of user privacy.

C. The collecting of immense amounts of user data. **D.** The using of collected data.

Question 47. Which of the following best paraphrases the underlined sentence in paragraph 4?

A. Teachers should take care of more engaging activities while repetitive tasks are for AI tools.

B. AI tools can do both the repetitive tasks and complex interactive activities without the help of teachers.

C. Teachers should upgrade AI tools so that they can devote to harder, more engaging activities.

D. Teachers can use AI tools to do repetitive, mechanical tasks so that they can devote to harder, more engaging activities.

Question 48. Where in paragraph 1 does the following sentence best fit?

"For instance, apps like Duolingo or chatbots powered by generative AI can simulate conversations that adapt in real-time to the user's responses."

A. [**IV**] **B.** [**III**] **C.** [**I**] **D.** [**II**]

Question 49. What can be inferred about the future of language learning from the passage?

A. It will be completely automated with no need for human teachers.

B. It will focus solely on translation rather than communication.

C. It will likely involve a blend of AI technology and human guidance.

D. It will return to traditional methods as people reject technology.

Question 50. The word "**reconfigured**" in paragraph 4 is closest in meaning to _____.

A. ignored **B.** preserved **C.** reshaped **D.** eliminated

---------- THE END ----------
